# 1.0 General Information

*1.1 System Overview*

*1.2 Organization of the Manual*

## **1.0 General Information**

General Information section explains in general terms the system and the purpose for which it is intended.

### **1.1 System Overview**

Quote Keeper is an android application which is all about keeping quotes.

The developers have observed that there are a lot of android applications for quotes available but none of them have the functionality that can make a user add in what quotes he/she likes. Quote Keeper lets a user save his/her favorite quote for future preferences. The user can save quotes from a favorite author, book, famous celebrities, and even from a random person or his/her own quote. The application has also this feature where the user can share in different social networking sites the quotes he/she have kept.

Quote Keeper works on mobile or tab devices which run in an Android operating system.

### **2.1 Organization of the Manual**

The user's manual consists of four sections: General Information, System Summary, Getting Started, and Using The System.

General Information section explains in general terms the system and the purpose for which it is intended.

System Summary section outlines the uses of the system's hardware and software requirements, system's configuration, user access levels and system's behavior in case of any contingencies.

Getting Started section explains how to get Quote Keeper and install it in an android device. The section also briefly explains the system menu.

Using the System section provides a detailed description of system functionalities.

## 2.0 System Summary

*2.1 System Configuration*

*2.2 User Access Levels*

*2.3 Contingencies*

## **2.0 System Summary**

System Summary section outlines the uses of the system's hardware and software requirements, system's configuration, user access levels and system's behavior in case of any contingencies.

### **2.1 System Configuration**

Quote Keeper operates on mobile devices that run with Android operating system. It is compatible with android Android 1.5 API level 3 and higher versions. The application does not require internet connections. It saves the quotes in its application database. After installation on the device, Quote Keeper can be used immediately without any further configurations.

### **2.2 Users Access Levels**

Anyone who has an Android device and has the knowledge to use it can use the application.

### **2.3 Contingencies**

In case of power outage data are saved in internal memory since the application uses SQLite Database.

## 3.0 Getting Started

*3.1 Installation*

*3.2 Welcome Screen*

*3.3 System menu*

## 3.0 Getting Started

Getting Started section explains how to get Quote Keeper and install it in an android device. The section also briefly explains the system menu.

### 3.1 Installation

The newest installation version currently available of Quote Keeper is available and can be downloaded for free at <http://www.jyapplications.com/php/android/quotekeeper/download/QuoteKeeper.apk> and is an .apk file. After downloading the file, install it on any android mobile device.

### 3.2 Welcome Screen

Welcome Screen (Figure 1) is the first screen displayed when opening the application. This screen displays the name and copyright statement of the application.

*Figure 1. Welcome Screen*

### 3.3 System Menu

QuoteKeeper is a tabbed application which consists of 3 tabs (Figure 2). The first tab shows a brief description of the application. The second tab is the Home tab. The third tab contains a list of “favorited” quotes by the user.

*Figure 2.Quote Keeper Tabs*

### 3.3.1 Information Tab

The Information tab (Figure 3) displays a brief description of the application. It states the major functionalities of Quote Keeper.

Figure 3. Information Tab

### 3.3.2 Home Tab

The Home tab (Figure 4) includes 4 clickable menus – Author, Book, Random, and iQuote.

Figure 4. Home Tab

### 3.3.3 Favorites Tab

The Favorites tab (Figure 5) displays a list of “favorited” quotes by the user.
